

AMENDMENT

In the Claims:

Please cancel claims 1-4 without prejudice.

Please add the following claims 5-8.

Sub 0.1 5. An engine-generator arrangement comprising:
an internal combustion engine with an output shaft and an engine casing and an
electric generator for producing electricity; said electric generator comprising a drive
shaft and a generator casing, wherein said output shaft of said internal combustion
engine is connected to said drive shaft of said electric generator by way of an elastic
coupling and wherein said engine casing is connected to said generator casing by way
of at least one elastic intermediate member so that a direct contact between said engine
casing and said generator casing is avoided.

6. An engine-generator arrangement according to claim 5 wherein said elastic
intermediate member comprises a rubber-elastic elastomer layer.

7. An engine-generator arrangement according to claim 5 wherein said engine
casing comprises a first flange and said generator casing comprises a second flange,
wherein said first flange and said second flange are connected together by way of said
elastic intermediate member.
